ABOUT ME

My name is Elias Cazessus. I am a front-end web developer based in the San Francisco Bay Area.

Currently, I am studying mobile app development using React Native as part of Harvard/edX's CS50 program.

I am looking for a Front-End Developer position in which I can exercise my skills and display my willingness to learn. Whether there is a deadline to meet or a meticulous task at hand I am able to work efficiently as part of a team as well as independently.

EDUCATION

Vista High School
2014
High School Diploma

Berkeley City College
2017
Intro to Computer Science

Harvard/Edx
2020
CS50s Web Programming with Python and Javascript

CS50s Mobile App Development with React Native
(in progress)

PROJECTS

Flack
An online messaging service built using Flask and Socket.io. Similar in functionality to Slack or Discord, users are able to create a display name, and join an existing channel. Additionally, users are able to create a channel name and post pre-defined statuses that are broadcast to all users connected to the server.

Laner Electric Supply
A landing page for a reputable and local electric supply company. Built using bootstrap, and javascript as well as integration of the google maps API and use of formspree.io, which allows users and customers to submit orders to the company e-mail.

EXPERIENCE

Front-End Web Developer (Freelance)
Present
Communicating with clients about expectations of projects. Adjusting to changing requirements from minor design changes to full reworks of design and functionality, as well as design work for clients in Photoshop.
